- **DevOps:** CI/CD (Basic), GitHub Actions (Basic)
- **Concepts:** Authentication & Authorization, RBAC, API Integration, Secure Coding
- **Methodologies:** Agile Scrum

WORK EXPERIENCE

Backend Developer

Dibasys Pvt Ltd, Kerala

Jan 2024 – Present

Project: Swift Checkin (Workforce Management SaaS Platform)

- Developed backend modules for timesheets, payroll, and invoices supporting 35+ users
- Designed and secured RESTful APIs improving system integration by 40%
- Built RBAC system for approval workflows reducing manual effort by 30%
- Strengthened API security through robust authentication and authorization mechanisms
- Integrated Xero APIs (OAuth 2.0) for timesheet and employee synchronization
- Optimized MySQL queries using indexing and joins, reducing execution time by 40–50%
- Enhanced performance using pagination, filtering, and sorting for large datasets
- Ensured data integrity by applying validation and sanitization techniques
- Troubleshoot and resolved 25+ critical production issues in collaboration with Agile Scrum teams
- Tested and validated APIs to ensure reliability and performance

PROJECTS

SaaS Subscription API

Tech: Laravel, REST API, MySQL

- Built subscription management system with full lifecycle (create, upgrade, cancel)
- Reduced duplicate subscription errors by 80% using validation logic
- Implemented secure authentication using Laravel Sanctum for token-based authentication
- Developed scalable REST APIs with structured JSON responses

EDUCATION

B.Tech – Computer Science Engineering

PRIST University, Thanjavur (2025)

LANGUAGES

Malayalam (Native), English (Professional), Tamil (Intermediate)
